

## SEEKTECH® SR-20 UTILITY LINE LOCATOR

The SeekTech SR-20 is a lightweight yet rugged utility line locator for locating underground cables and pipes. The SR-20 features an omnidirectional antenna array and gradient antennas to quickly locate and follow the target line's path.

- Mapping display shows the utility's estimated position, direction, and depth.
- Omnidirectional antennas detect the complete signal field for greater speed and accuracy
- Gradient antennas provide left/right guidance for centering over signal
- Distortion indicator shows signal shape inaccuracies so steps can be taken to improve signal
- Foldable mast for easy transport and storage

CAT. NO.	DESCRIPTION
21893	SeekTech SR-20 Line Locator
46918	SR-20 + ST-305 Transmitter + 4" Inductive Signal Clamp
66508	SR-20 + ST-305R Transmitter + Inductive Clamp and Locator 18V Adapter

## SEEKTECH® SR-24LE UTILITY LINE LOCATOR

The RIDGID® SeekTech® SR-24LE receiver gives utility locating professionals the information they need to confidently determine the position of underground utilities. Built on the trusted and time tested SR-20 platform, the SR-24LE has integrated GPS and Bluetooth® Low Energy (BLE) technology, giving a real-time stream of data to Bluetooth® enabled devices. Mapping display shows the utility's estimated position, direction, and depth.

- Omnidirectional antennas detect the complete signal field for greater speed and accuracy
- Gradient antennas provide left/right guidance for centering over signal
- Distortion indicator shows signal shape inaccuracies so steps can be taken to improve signal
- Foldable mast for easy transport and storage.
