

QUICK AND EASY ONE-HANDED OPENING

Your pocket knife is one of the tools you use daily. Klein improves on this everyday carry tool with a spring-assisted open action you can deploy quickly with one hand. A liner lock secures the stainless steel blade open. The drop point blade has both a serrated and a fine edge for greater versatility. While the safety lock on the handle keeps the knife closed and the low-setting pocket clip keeps it low in your pocket, this knife is not only easy to open, it's easy to carry.
