

Needle Probe Extension

DESIGNED FOR HVAC/R APPLICATIONS

Expand the capability of D-TEK® 3 or D-TEK Stratus® refrigerant leak detector with the versatile Needle Probe Extension (part # 721-612-G1). This precision-engineered accessory helps HVACR professionals access hard-to-reach or confined areas. Use the needle probe to diagnose problems in unique applications like VRF and other systems that have hard-to-access refrigerant lines, and even check for leaks in insulated areas without removing insulation.

SPECIFICATIONS

Length	9 in. (229 mm)
Width	5/32 in. (4 mm)
Material	Base: Plastic, Probe: Brass

Compatible Leak Detectors

D-TEK 3
D-TEK Stratus

ADVANTAGES

- Extends the probe for longer reach
- High-quality rigid brass material
- Rigid, metal design for precision and durability
- Enables access to tight spaces
- Pierces pipe insulation

APPLICATIONS

- Piercing through pipe insulation to access refrigerant pipes
- Checking behind walls to diagnose hidden issues with VRF systems
- Extending reach to access tight spaces and components
