10	44662	Roll Pin	22	77157	O-Ring	†34	26707	Transmission Grease, 1 Lb.
11	58957	Hand Wheel	23	77132	Retaining Ring, Internal	35	77017	Chuck Key
12	77152	Carry Handle	24	46295	Spacer			

† Service Notes:

Ref. 4 Backlash Adjustment – Use 6" C-Clamp to lightly push chuck into housing. Apply thin coat of Loctite No. 545 Hydraulic/Pneumatic Thread Sealant (or equivalent) to threads on adjusting cap, Ref. 4. Tighten cap to 40 - 50 in-lbs then back off to eliminate torque. Re-tighten finger tight then back off 20° to 30°. Remove clamp and check by gripping chuck with fingertips and feeling for minimal rotational backlash in output gear. Tighten set screw, Ref. 6, to hold cap securely.

Ref. 36 Grease Fill – Use only recommended transmission grease (Molytex EPO). Fill bearing pockets with grease and apply coating to gear teeth. Fill two separate transmission cavities approximately 1/2 full of grease using about 1/4 of pound can

Motor Type 2

**NOTE: Order parts by Catalog Number only.
DO NOT order by Reference Number.**

Ref. No.	Catalog No.	Description	Ref. No.	Catalog No.	Description
1	10908	Screw, Self Tapping (4)	10	77027	Motor Lead Set
2	10913	End Cap	11	35328	Fan Shroud
3	10918	Bumper (2)	12	77207	Seal
4	34078	Brush Assembly Set 115V	13	77202	O-Ring
	34083	Brush Assembly Set 230V	14	77232	Bearing
5	10923	Screw, #10-24 x 2" Soc. Hd. Cap (6)	15	77227	Armature Sleeve
6	10928	Insulator	16	43017	Bearing
7	77267	Warning Label Set	†17	84087	Armature Assembly 115V
8	22038	Motor Housing		84082	Armature Assembly 230V
†9	45897	Field 115V		84092	Armature Assembly 100V
	58567	Field 230V	18	42777	Rubber Sleeve
	58572	Field 100V			

† Service Note: When replacing early style 115V or 230V armature# or field# you must replace with both new style armature#, field# and brushes#.

Motor Type 2 – Motors built after serial number EBH XXXXX 1109

[illegible]

The diagram shows the following components and connections:

- Power Source:** A line labeled "GREEN YELLOW" and a "GROUND" connection.
- Motor:** A trapezoidal shape labeled "MOTOR" with two "BLACK" wires and one "BLUE" wire.
- Soft-Start:** A rectangular box labeled "SOFT-START" with three input terminals on the left and two output terminals on the right.
- Circuit Breaker:** A rectangular box labeled "CIRCUIT BREAKER" with two input terminals on the left and two output terminals on the right.
- Switch:** A rectangular box labeled "SWITCH" with four terminals (two on the left, two on the right).

Wiring Connections:

- The "GREEN YELLOW" line and "GROUND" connection are connected to the "CIRCUIT BREAKER".
- The "BROWN" line is connected to the top input terminal of the "CIRCUIT BREAKER".
- The "CIRCUIT BREAKER" output terminals are connected to the "SWITCH".
- The "SWITCH" output terminals are connected to the "SOFT-START".
- The "SOFT-START" output terminals are connected to the "MOTOR".
- The "BLUE" wire is connected to the bottom input terminal of the "SOFT-START".

Diagram illustrating the wiring for a 240V single-phase motor. The circuit includes a power source (Ground, Green, Black, White), a Circuit Breaker, a Switch, and a Motor. The wiring connections are as follows:

- Ground (Green) is connected to the ground terminal.
- Black is connected to the Circuit Breaker.
- White is connected to the Wire Nut.
- The Circuit Breaker output (Black) is connected to the Switch.
- The Switch output (Black) is connected to the Motor.
- The Wire Nut connects the White line to the Motor.
