SECTION 4: First-aid measures

Description of first aid measures

First-aid measures general : Adverse effects not expected from this product. If you feel unwell, seek medical advice (show

the label where possible).

First-aid measures after inhalation : Adverse effects not expected from this product. First-aid measures after skin contact Adverse effects not expected from this product. First-aid measures after eye contact Adverse effects not expected from this product.

First-aid measures after ingestion Ingestion is not considered a potential route of exposure.

Most important symptoms and effects (acute and delayed)

Symptoms/effects after inhalation : None under normal use.

Most important symptoms and effects, both acute and delayed

: No effect on living tissue. Refer to section 11.

Immediate medical attention and special treatment, if necessary 4.3.

None

SECTION 5: Fire-fighting measures

Suitable (and unsuitable) extinguishing media

Suitable extinguishing media : Water spray or fog.

Unsuitable extinguishing media : Do not use water jet to extinguish.

Specific hazards arising from the chemical

Reactivity : No reactivity hazard other than the effects described in sub-sections below.

Hazardous combustion products : None

Special protective equipment and precautions for fire-fighters

Special protective equipment for fire fighters : Standard protective clothing and equipment (e.g, Self Contained Breathing Apparatus) for fire

fighters. Standard EN 469 - Protective clothing for firefighters. Standard - EN 659: Protective gloves for firefighters. Standard EN 137 - Self-contained open-circuit compressed air breathing

apparatus with full face mask.

Specific methods Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat

radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. Exposure to fire may cause containers to rupture/explode. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Continue water spray from protected position until container stays cool. Move containers away from the fire

area if this can be done without risk.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures 6.1.

: None

General measures : Try to stop release

For non-emergency personnel

No additional information available

For emergency responders

No additional information available

Environmental precautions 6.2.

None.

6.3 Methods and material for containment and cleaning up

Methods and material for containment and

cleaning up

SECTION 7: Handling and storage

Precautions for safe handling

Safe handling of the gas receptacle

: Protect cylinders from physical damage; do not drag, roll, slide or drop. Do not remove or deface labels provided by the supplier for the identification of the cylinder contents. Refer to supplier's container handling instructions. Do not allow backfeed into the container. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. If user experiences any difficulty operating cylinder valve discontinue use and contact supplier. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Keep container valve outlets clean and free from contaminants particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to transfer gases from one cylinder/container to another. Never use direct flame or electrical heating devices to raise the pressure of a container. Containers should be stored in the vertical position and properly secured to prevent them from falling over.

Safe use of the product

The product must be handled in accordance with good industrial hygiene and safety procedures. Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations. Ensure the complete gas system was (or is regularily) checked for leaks before use. Do not smoke while handling product. Do not remove or deface labels provided by the supplier for the identification of the cylinder contents. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.

Conditions for safe storage, including any incompatibilities

Incompatible materials

Conditions for safe storage, including any incompatibilities

: Flammable materials.

Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over. Stored containers should be periodically checked for general condition and leakage. Keep container below 50°C in a well ventilated place. Store containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials.

Storage area Store away from heat. Store in a well-ventilated place.

SECTION 8: Exposure controls/personal protection

Control parameters

Oxygen (7782-44-7)		
Not applicable		
Nitrogen (7727-37-9)		
ACGIH	Remark (ACGIH)	Simple Asphyxiant

Appropriate engineering controls

Appropriate engineering controls

: Provide adequate general and local exhaust ventilation. Systems under pressure should be regularly checked for leakages. Consider the use of a work permit system e.g. for maintenance activities.

Environmental exposure controls : None necessary.

Individual protection measures/Personal protective equipment 8.3.

Hand protection:

Wear working gloves when handling gas containers. Standard EN 388 - Protective gloves against mechanical risk.

Eye protection:

Wear safety glasses with side shields. Standard EN 166 - Personal eye-protection - specifications

Respiratory protection:
