**IDEAL**

Feed-Thru CAT5e RJ-45 8P8C Modular Plug

Feed-Thru connectors simplify modular plug terminations by allowing the user to verify wire order and conductor length before crimping the connectors to the cables. Simpler assembly, no wasted connectors.

- Feed-thru design for wire order verification before crimping
- Flush cut of wires to the face of the connector when used with 30-495 crimp tool
- 50µ gold plated contacts to minimize wear on individual contacts
- 3 prong contacts for secure connection to each wire
- Designed for 100MHz application compatibility (CAT5e)
- Fits cables up to .270" jacket diameter
- Fits most cables with 24 AWG solid/stranded conductors
- Compatible with 23 AWG solid conductors (CAT6) cables up to 0.041" diameter conductors
- Recommended IDEAL cable jacket prep tool: 45-605
- Recommended crimp tools: 30-495
- Connectors can be crimped with a standard tool. Wire ends will not be cut with standard tool and must be cut manually.

Verify conductor order before crimping

Wires cut flush with plug face

Part No.	Qty
85-370	25/Card
85-371	50/Card
85-342	100/Bag
