## Immersion Temperature Sensor Datasheet

The AcuTEMS IM series immersion temperature sensor is designed to monitor liquid temperature in chilled water lines, boiler piping, and other low-flow and low-pressure applications. The immersion sensor comes in several probe lengths with multiple RTD, thermistor, and transmitter output options suitable for various BAS controllers. The IP65 enclosure also prevents dust and moisture ingress. The 2-piece welded 304 stainless steel thermowell with pre-applied heat transfer paste enables accurate temperature measurement while protecting the sensor probe from corrosive substances and high pressure.

### Features

- 304 stainless steel thermowell with  $\frac{1}{2}$ " NPT connection and set screw to secure the probe.
- Thermal paste pre-applied on temperature probe for better heat transfer.
- Convenient installation with push-in button terminal and quick release enclosure screws.
- IP65 enclosure provides superior protection against dust and moisture.
- 100Ω Platinum, 1KΩ Platinum/Nickel RTDs, and 10KΩ Type II/Type III, 20KΩ thermistors available.
- Three wire terminals provide flexibility for 2-wire or 3-wire installation for resistive temperature output.
- Optimized for building automation systems, delivering rapid response time of <10s.
- 4-20mA and 0-10VDC output options compatible with different BAS controllers.

<sup>†</sup>**Important:** Special Order Span and Probe Length will increase lead times and may be subject to minimum order requirements.

**Note:** Selecting the "08 Transmitter, 1KΩ Platinum RTD Other Span" option allows the transmitter to be calibrated within a -40°C to +100°C (-40°F to 212°F) measurement range. The custom range must be specified at the time of ordering.
