BENEFITS:

The Ashcroft® DG25 series offers 0.5% of span accuracy. Laser-welded stainless steel sensor and socket make this product suitable for use with a wide variety of pressure media in demanding industrial applications. This series is also available with enhanced accuracy of 0.25% of span making it suitable for many test and measurement uses.

IP67 ingress protection rating means the DG25 is suitable for demanding applications such as equipment wash down.

Comes with nine preprogrammed engineering units of measure to read pressure in units applicable to the process, or a unit familiar to the technician using the gauge.

The DG25 comes standard with many features such as: tare, min and max memory, programmable custom engineering units, and pressure ranges from vacuum to 25,000 psi.

The DG25 was designed with the OEM in mind and can easily be custom configured to meet unique requirements, add or delete features and be customized with private label keypad overlays. Contact Ashcroft or your authorized distributor to discuss your OEM requirements.
