

Easy-to-use digital gauge with large easy-to-read display

- Simple operation, easy-to-use, accurate
- Large easy-to-read LCD display
- Ergonomic, durable, heavy-duty metal construction
- Push-button selectable lbf, kgf, and Newton units
- RS-232C, Digimatic and analog outputs
- Programmable High/Low setpoints with LCD indicators
- Overload capacity 200% F.S.
- Overload alarm, display flashes at overload limit
- Low battery icon
- Runs on internal NI-MH batteries or AC adapter
- Selectable real time or peak mode operation
- Push-button tare function
- Reversible display
- Set of six attachments, AC charger/adapter and carrying case

DS2 digital force gauges feature a large, easy-to-read LCD display and simple push-button operation. An ergonomic metal housing protects the highly accurate loadcell and electronics in tough industrial environments.

When measuring, units of measure and a tension or compression icon are displayed. A battery icon indicates the NI-MH batteries are low. If an overload occurs the display will flash to warn you.

If desired, you can program high/low setpoints to enable Go/NoGo testing using the LCD indicators. Standard outputs (RS-232C, Digimatic, and ± 1 VDC analog) enable you to acquire data for permanent record.

Choose a range or ranges that best suit your application. All DS2 gauges are sold in a complete kit with gauge, hard plastic carrying case, a set of six measuring attachments and AC adapter/charger. All DS2 gauges can run on the internal NI-MH batteries or the AC adapter/charger. An optional handle to facilitate the measurement of heavy loads is also available.

SW-1 Data Acquisition Software (optional)

You can acquire and analyze real-time data from any Imada gauge with an RS-232 port directly into any Windows program. Log and chart measurements as well as statistical information and control the gauge from your computer.

DB-1 Data Input Button (optional)

DB-1 is a simple, compact, one channel interface that enables the user to send measurement data to a PC running SW-1, Imada data acquisition software or other software. The data input button

simplifies peak measuring tests because it 'zeros' the gauge after sending the data to the computer

DS2 Kit

Accuracy	$\pm 0.2\%$ F.S., ± 1 LSD
Selectable Units	lbf(ozf), kgf(gf) or Newtons
Overload Capacity	200% of F.S. (Overload indicator flashes beyond 110% of F.S.)
Data processing speed	1,000 data/second (30 data/second rate selectable)
Display Update	10 times/second
Power	Rechargeable Ni-MH battery pack or AC adapter
Battery Indicator	Display flashes battery icon when battery is low
CPU	8-bit CMOS
Setpoints	Programmable high/low setpoints with LCD indicators
Outputs	RS-232C, Digimatic and ± 1 VDC analog output
Operating Temp.	32° to 100°F (0° to 40°C)

DS2 Ranges (Resolution) Accuracy: $\pm 0.2\%$ F.S. ± 1 LSD

Model	Capacity (Resolution)		
	Pounds/Ounces	Kilograms/Grams	Newtons
DS2-0.4	7.00 (0.01 ozf)	200.0 (0.1 gf)	2.000 (0.001 N)
DS2-1	18.00 (0.01 ozf)	500.0 (0.1 gf)	5.000 (0.001 N)
DS2-4	4.400 (0.001 lbf)	2.000 (0.001 kgf)	20.00 (0.01 N)
DS2-11	11.00 (0.01 lbf)	5.000 (0.001 kgf)	50.00 (0.01 N)
DS2-44	44.00 (0.01 lbf)	20.00 (0.01 kgf)	200.0 (0.1 N)
DS2-110	110.0 (0.1 lbf)	50.00 (0.01 kgf)	500.0 (0.1 N)
DS2-220	220.0 (0.1 lbf)	100.0 (0.1 kgf)	1000 (1 N)

Model DS2

- Full SPC and graphing capabilities
- Designed for Imada gauges
- Automates your data collection

**PRICING

SUPPORT**

SW-1 is a highly customized Excel spreadsheet specifically designed for capturing and analyzing real-time data from Imada gauges with an RS-232C port.

SW-1 allows real time data from RS-232C instruments to be input directly into any Windows program – including Microsoft Excel. SW-1 inputs gauge readings in real time and provides a running log of all force measurements along with a chart of the data as well as statistical information including Min, Max, Mean, Median, Standard Deviation, Average Deviation and Variance.

Complete control of the gauge is provided through a set of “buttons” on the spreadsheet that enable easy editing of the

sampling rate, force measurement units, peak/real time, tare and power off.

Other features include a memory download option for Z2, Z2S-DPU and Z2H gauges only. If desired, the entire stack can be saved to disk, analyzed or cleared. Because all data is entered directly into a standard Excel spreadsheet, you are virtually unlimited in your ability to analyze your force gauge data using all of the powerful tools available in Excel.

Hardware Requirements: Imada Gauge with RS-232C serial port, CB-203 or CB-204 cable, a Pentium or equivalent with 32MB RAM or better, a mouse and approximately 1 MB hard disk space.

Software Requirements: Windows 95 or later, Windows NT and Excel '97 or later.

Use Data Button to send data to PC and zero the gauge!
