

EL-USB

## Quick Start Guide

Windows™ 7/8/10 (32 & 64bit)

The screenshot shows the LASCAR website. At the top, there is a navigation bar with the LASCAR logo on the left and contact information on the right: "Login: [Create Account](#)", "email: [info@lascar.fr](#)", and "phone: [+33\(0\)7474 890367](#)". Below the navigation bar, there is a horizontal menu with links: Home, Products, Product/FA22 University, EasyLog User, Software, Markets, About Us, Downloads, News, Events, Support, and Live Tools. The main content area is titled "EasyLog USB". It features the EasyLog logo and a description of the software. The text states: "EasyLog USB is a software designed to log data from a USB device. It is a software designed to log data from a USB device. It is a software designed to log data from a USB device." Below the description, there is a red button labeled "Download". At the bottom of the page, there is a section titled "Welcome to EasyLog USB Software" and a large image of the software interface.

- Insert the data logger into an available USB port on your PC.
- Double click on the EasyLog USB icon on your Windows™ desktop. This will load the configuration software. Click 'Set up and start the USB data logger' and follow the set-up wizard.
- When setup is complete, the data logger should be removed from the USB port. **Do not leave your data logger in the USB port for extended periods as this will cause some of the battery capacity to be lost** (with the exception of EL-US-1-RCG).
- You can also download the data from a logger that has been recording or view previously saved data from the software.

## REPLACING YOUR DATA LOGGER'S BATTERY

The logger is provided with a 3.6V 1/2AA battery already installed. You may replace the battery by following the instructions below.

### EL-USB-1 PRO

Before using the data logger you will need to insert the 3.6V 2/3AA High Temperature battery provided, following the instructions below.

### EL-USB-1-RCG

The EL-USB-1-RCG's battery is preinstalled. To charge the battery, connect to a USB port until the green LED shows. The rechargeable battery should only be replaced by an authorized supplier.

#### OUR RANGE

### EL-USB

Simple Low Cost  
Data Logging

- USB interface for configuration and download
- Easy to use Windows control software

### EL-CC

Cold Chain Logistics  
Loggers

- Low cost, reusable and waterproof
- Comes with pre-configured alarms

### EL-GFX

Advanced Data Logging

- Graphic LCD for real-time readings and graph
- Compact and robust design

### EL-WiFi

Wireless Data Logging

- Cloud based monitoring with email alerts
- Connects to an existing WiFi network

### EL-MOTE

Cloud-based Data  
Logging

- Cloud based monitoring from any internet enabled device
- Quick and easy set-up from smartphone App

Temperature

Temperature/  
Relative Humidity

Voltage

Current

Event, State & Count

Thermocouple

Carbon Monoxide

Thermistor

#### IMPORTANT SAFETY INFORMATION

##### Repairing or Modifying

Never attempt to repair or modify Lascar products. Dismantling them, other than for the purpose of changing replaceable batteries, may cause damage that is not covered under the warranty. Servicing should only be provided by an authorized supplier.

##### Disposal and Recycling Information

You must dispose of Lascar products in accordance with relevant laws and regulations. They contain electronic components and lithium batteries and therefore must be disposed of separately from household waste.
