Energy Meters

Simple System Integration with a Variety of Protocol Options Available

H81xx

VERIS INDUSTRIES

DESCRIPTION

The **H81xx Series Energy Meters** are easy to install and provide exceptional system accuracy, making them ideal for all submetering applications.

Each meter is factory-matched with one to three split-core CTs. The meter/CT pairs are system-calibrated to provide excellent total system accuracies of 1% from 2% to 100% of the amperage rating of the CTs (e.g., 2-100 amps with 100 amp CTs). Matching serial numbers assure that the meter and CT were calibrated together (matching does not apply if using 100A CTs).

The H81xx is easy to install. The split-core CTs eliminate the need to remove electrical conductors, reducing installation time. The meter is also capable of detecting and correcting phase reversal, eliminating the need for concern about CT load orientation. The convenient color coding of the CTs and voltage leads make correct connection simple.

APPLICATIONS

- Commercial tenant submetering
- Performance contracting
- Allocating costs
- Real-time power monitoring via local display or through control/data acquisition systems

FEATURES

- Revenue Grade measurements
- High resolution backlit LCD display provides clear readings at a distance...
 reduces the risk of misinterpretation of the data. Back-lighting can be disabled if desired
- H8163 provides a pulse output from 1/10 to 1 pulse per kWh for easy connection to existing control or data acquisition systems
- Provides a phase-loss alarm...protects equipment (H8163)
- With the optional communications board (H81xx-CB), the H81xx can easily be added to a Modbus, BACnet or N2 control system network to report multiple variables including kW, kWh, kVAR, PF, Amps and Volts, providing crucial power information at a reduced installation cost

SPECIFICATIONS

Inputs:

90-132VAC line-to-neutral
90-300VAC line-to-neutral
±1% of reading from 2% to 100% of the rated current of the CTs, accomplished by matching the CTs with electronics and calibrating them as a system
1280 Hz
1.2" x 3.8" (31 mm x 97 mm) viewing area, 160 segments, backlit with LCD
Normally open, Opto-FET, 100mA@24VAC/DC
0.10*, 0.25**, 0.50, or 1.00kWh per pulse
200 msec closed
N.O. (opens on alarm), Opto-FET, 100 mA @ 24 VAC/DC; fixed threshold 25% below
NEMA 1
0° to 50°C (32° to 122°F)
-40° to 70°C (-40° to 158°F)

Approved for California CSI Solar applications (check the CSI website for model numbers).

Humidity Range

Agency Approvals

 ${\it Note: Meter and CTs serial numbers must match, except for 100A CTs. Neutral voltage connection is required.}$

0-95% noncondensing
