

Current Switches with Relay: Adjustable Trip Point

H735, Hx38, Hx48, Hx58 Series

DETECTS BELT LOSS/COUPLING SHEAR!

Now you can easily detect when drive belts slip, break, or pump couplings shear. In fact, a typical HVAC motor that loses its load has a reduction of current draw of up to 50%. That's why our sensors are the industry standard for status.

Status & Control In One Package

FEATURES

- Combines command relay and fan/pump status sensor in a single, easy to install unit
- Reduces number of components installed...fits better in small starter enclosures
- Detect belt loss and motor failure...ideal for fan and pump status
- H748 and H948 feature a SPDT command relay...control two outputs with a single relay
- Bracket on H938, H948, and H958 can be installed in three different configurations...added flexibility
- Reduced charges from electrician
- Relay and status LEDs for easy setup
- Polarity insensitive status output...fast and easy installation
- Adjustable setpoint for current sensor status...fits many applications
- 5-year warranty

DESCRIPTION

The Hawkeye Relay Combination Series is the ideal solution for the automation installer. These units combine a current switch and relay into a single package, reducing the space required for total control of fans and pumps. The current switch and relay operate independently of one another. These devices allow start/stop control and status monitoring with one device instead of two.

APPLICATIONS

- Starting/stopping and monitoring positive status of motors
- Detecting belt loss and coupling shear
