

HVD132 Non-Contact High AC Voltage Detector

Check and detect live high voltage cables

Features:

- Two ranges: High 1.5kV to 132kV/Low 50V to 1.5kV
- Circuit Test function ensures proper operation before testing live wires
- Audible and Visual Alarms increase in frequency and become continuous at the voltage source
- Hot stick mountable for high voltage use (hot stick not included)
- Includes 9V battery and carrying case
- 2 year warranty

Applications:

- Check and detect live high AC voltage cables up to 132kV
- Non-contact detection of low AC voltages (>50V) in cables, wall outlets, circuit breakers, and more
- Trace live wires
- Find faults in cables

Specifications

AC Voltage Range	Low: 50V to 1.5kV High 1.5kV to 132kV
AC Frequency Range	50/60Hz
Response Time	Instantaneous
Duty Cycle	Continuous
Audible Alarm	Buzzer increases from intermittent to continuous
Visual Alarm	2 Red LEDs blink faster as you get closer
Power	9V Battery
Dimensions	12.5 x 3 x 2.8" (318 x 75 x 71mm)
Weight	8oz (227g)
