- Highest Accuracy in the Industry | ± 1%
- LED Changes from Green to Red
- 330° Rotating Head | Tri-Display

## 

- 4-20mA + 2 Relay Outputs (5 amp)
- LED Changes from Green to Red in Upset Condition

## **Protect Your Equipment**

The Truflo® PPT Series is the Industry's most accurate and reliable Pressure Transmitter and Switch. The PPT Series is truly unique when it comes to pressure measurement in corrosive environments.

PPT Pressure Transmitters are a one-piece design and come equipped with a bright LED display that will change from green to red in any upset condi-tion.

The PPT is equipped with a 4-20mA output + 2 (5 amp) Relays. This feature is excellent for pump protection to prevent pumps from running dry.

The PPT Series is available in PP, PVDF & 316 SS and equipped with either a ceramic or stainless steel sensing diaphragm.

The NEMA 4X enclosure and polycarbonate faceplate gives the PPT a rugged, industrial design that allows it to stand up to the industry's most corrosive environments.

#### **Installation Instructions**

Do not tighten by grasping the case of the transmitter as this may cause damage. Always pressure test connections for leaks with water prior to use on chemical service. The user shall ensure that the correct transmitter pressure range and the correct materials of construction are selected.

#### Personal Protective Equipment (PPE)

Always utilize the most appropriate PPE during installation and service of Truflo products.

#### Pressurized System Warning

Sensor may be under pressure. Take caution to vent system prior to installation or removal. Failure to do so may result in equipment damage and serious injury.
