V Rogowski Integrator Kit

Datasheet

INTRODUCTION

The Accuenergy V Rogowski Integrator Kit (RIK) provides users with an easy-to-install, plug-n-play solution to be used with any power meters or equipment with a V nominal current transformer input. The V Rogowski Integrator will allow the installation of Rogowski coil CTs in a variety of applications where space constraints may limit the use of other current transformers

The 0-5V flexible coil integrator kit is designed with three independent channels of 0-5V or 0-10V output, plus a sum output channel and Accuenergy flexible Rogowski coil current sensor.

FEATURES

- Flexible rope-like current sensor, designed to easily fit into panels or busbars where space may be limited
- 0-5Vdc or 0-10Vdc output that works with any analog input controller or three channel integrator also has 4th sum channel to output total current from three channels
- Current sensing range from 2.5A to 50,000A to fit all systems
- Field-configurable CT ratios: 500A, 1kA, 2.5kA, 5kA, 10kA, 25kA, 50kA
- Individual CT ratios can be configured for each channel. Works in any single phase application with different current ratings
- Works in both 50Hz and 60Hz systems
