Electrodes — pH/Ion

Temperature probes

Order a temperature probe if you have an electrode without a built-in temperature sensor and you want to take readings with Automatic Temperature Compensation (ATC). Separate temperature probes offer faster temperature response and lower pH electrode replacement cost. See Connector Types key at right.

Single-junction, epoxy-body, gel-filled pH electrodes

- Our most economical electrodes!
- $-\,0$ to 14 pH models available—use for high sodium/ high pH solutions

These economical electrodes are ideal for field, clean water, and general-purpose applications. They feature a rugged epoxy housing. Pin-type junction provides low electrolyte flow for long life.
