

## Cole-Parmer® Digital Thermohygrometers

Don't let the humidity get to you

Cole-Parmer®

**A. Thermohygrometer**

This temperature/humidity indicator shows the exact air conditions in labs, hoods, stock rooms, and more. LCD also indicates "comfort," "humid," or "dry" conditions.

ABS plastic case is chemically resistant and shock-resistant. Thermohygrometer requires no adjustment or maintenance. Mount on the wall or place on a surface with included bench stand. Includes NIST-traceable calibration report supplied by the manufacturer.

**B. Jumbo Display Thermohygrometer**

This thermohygrometer is perfect for both indoor and outdoor applications. Large, 1 1/8" H display can be read as far as 35 feet away!

Thermohygrometer includes a submersible temperature sensor on a 10-ft cable and one AAA battery. Unit features ABS plastic housing. Wall-mount the thermohygrometer or use the flip-open stand. Includes NIST-traceable calibration report supplied by the manufacturer.

**C. Thermohygrometer with Minimum/Maximum Function**

Thermohygrometer displays temperature-compensated relative humidity in % RH, and temperature in °F or °C. Stores minimum and maximum RH and temperature readings—just press the front-panel MIN and MAX buttons to read stored values. Press the RESET button to continue displaying current RH and temperature conditions.

Thermohygrometer features an integral stand for easy desktop viewing and a wall mounting bracket. Includes NIST-traceable calibration report supplied by the manufacturer.

**D. Handheld Thermohygrometer with Data Output**

Measure and download temperature and humidity with these thermohygrometers.

Meters feature data hold, min/max, memory storage, selectable °F/°C, and auto-off. Model 37950-11 also calculates dew point and features an alarm for out-of-range conditions.

Includes hard case and one 9 V battery.
