

SEEK Scan™

kiosk

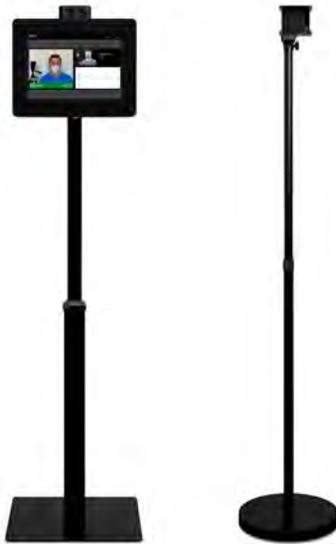

Simple Screening for Safer Communities

All-in-one solution helps businesses, institutions and venues reopen a safer environment

- Everything you need is included in the box
- Same performance as a temporal thermometer, but with a safe social distance
- Specifically designed and calibrated for skin temperature measurement
- Accurate, automated and affordable
- APIs available for access control, VMS and other network capabilities
- Meets FDA Guidelines for initial body temperature assessment

Seek™
thermal

Part Number
YW-AAK

Seek Scan™ Kiosk is an all-in-one, low-cost, thermal imaging system that's designed to automate body temperature screening by using skin temperature as a proxy. Everything you need to start screening in minutes comes included with Seek Scan Kiosk. This all-in-one solution comes with a Seek Scan Camera and Reference Heat Source, a 10" tablet, durable aluminum stands, and all required cables.

With $\pm 0.3^{\circ}\text{C}$ ($\pm 0.5^{\circ}\text{F}$) of accuracy, Seek Scan Kiosk delivers the same performance as an infrared temporal thermometer – but automated from a safe social distance.

The Seek Scan process has always provided an additional layer of preventive screening but with Seek Scan Kiosk we've made it easier than ever to deliver more peace of mind to businesses, institutions and participants.

Manufactured in the USA & NDAA compliant

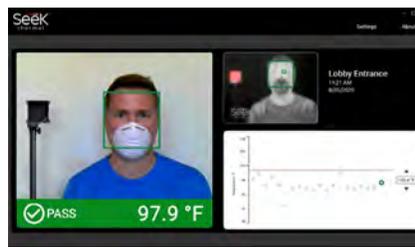

**Patents Pending*

PERFECT FOR:

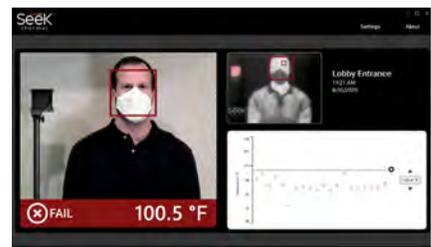

- Small, medium & large businesses
- Factories and warehouses
- Hotels & Restaurants
- Healthcare Facilities
- Venues, theaters and arenas
- Nursing homes
- Schools and daycares
- Gyms and other sports facilities

FACE DETECTED. SEEK SCAN IS MEASURING SKIN TEMPERATURE.

ESTIMATED BODY TEMPERATURE IS BELOW THE ALARM TEMPERATURE.

ESTIMATED BODY TEMPERATURE IS ABOVE THE ALARM TEMPERATURE.

KEY FEATURES

Fast, Automated Screening

In seconds, the system automatically detects a face, finds the most reliable spot to measure and displays a pass/fail alert.

Enables Social Distancing

Delivers the same performance as a temporal thermometer - but with a safe social distance.

Affordable Turnkey Solution

Affordable thermal screening system that meets FDA guidelines for initial body temperature assessment during the Covid-19 Public Health Emergency.

Email Notifications

Receive an email notification every time someone measures above the customizable alarm temperature.

API Integration

Send alarm events, trigger access control and video management systems, pull and present historical data to integrate and stream multiple Seek Scans into one enterprise solution.

Meets FDA guidelines

Seek Scan meets the accuracy specification, includes a reference heat source and is made for single person screening.

WHAT'S IN THE BOX

- Seek Scan camera
- Reference Heat Source
- 10" Windows 10 tablet
- Seek Scan software pre-installed on tablet
- Aluminum Kiosk stand, pre-wired
- Aluminum Heat Source stand, pre-wired
- Fasteners and tools for assembly
- Sticker Decal Kit: Seek Scan wall poster, "Stand Here" floor decal, "Wait Behind This Line" floor decal, and "Look here" camera decal
- Two tablet enclosure keys
- US, EU, UK AC plugs
- Quick Start Guide & Warranty

SKIN TEMPERATURE VS BODY TEMPERATURE

Seek Scan measures skin temperature as a proxy for body temperature.

Here are a few things to know about skin temperature measurement:

- Skin temperature is typically a few degrees less than body temperature. Similar to an infrared temporal thermometer, Seek Scan uses skin temperature to provide an estimated body temperature.
- Seek Scan is programmed to measure the most reliable parts of the face to produce the best results with high accuracy.
- A person's skin temperature may vary based on a variety of circumstances such as ambient temperature, sweat and eyewear. For this reason, Seek Scan is intended for indoor use only and in environmentally controlled rooms.
- Distance is critical to performance. We recommend marking the floor with tape or decals to ensure all subjects are measured from the exact same distance and while positioning the subject next to the heat source.

As the #1 supplier of thermal sensors to the Public Safety market and one of the largest suppliers of all commercial thermal sensors globally, we have built hundreds of thousands of thermal cameras used worldwide.

TECHNICAL SUMMARY

Camera & Tablet Specifications	Description
Thermal Sensor Resolution	206 (h) x 156 (v)
Visible Light Camera Resolution	640 x 480
Horizontal / Vertical Field of View	35° (h) / 26° (v)
Lens Focal Length / F-Number	4.0mm / f/1.20
Frame Rate	<9Hz
Tablet	10.1" touchscreen running Windows 10 pre-installed with Seek Scan Software
Power	100 V to 240V 50/60Hz
Fixed Heat Source Specifications	
Temperature-Controlled Device	Emits a constant reference temperature
Dimensions (L x W x H) & Weight	3 x 9 x 9.5 cm / 80 g
Mount	1/4"-20 Standard Camera Tripod Mount (Stand Included)
Power	110V to 220V 50/60Hz (Plugs into Wall Outlet)
Measurement Specifications	
Temperature Accuracy	± 0.3°C (0.5°F) typical between 36°C to 40°C (96°F to 104°F) @ 1.5 meters (5 feet) Verified in a laboratory setting using a fixed heat source
Sensor Sensitivity	40 mK typical, <50 mK max @ 25°C (Post Signal Processing)
System Specifications	
Scan Measurement Time	1 to 3 seconds typical
Operating Temperature	Optimal temperature accuracy in conditions below 105°F (40°C) ambient
API Capabilities	RTSP streaming video and UDP & TCP commands via JSON
Stand Specifications	
Height Compatibility	Adjustable for individuals from 3 feet (1m) to 7 feet (2.1m)

Sticker Decal Kit Included

ABOUT SEEK THERMAL

Seek The Unseen®

An unseen world of energy surrounds us. We only see some of it with our eyes, light from a source of energy reflected on objects around us. But even though we can't see it, all objects produce or retain heat. When viewed through a Seek Thermal camera, this world of heat can be converted to images, providing important information useful in solving everyday problems that are otherwise invisible to the naked eye. Seek thermal imaging lets you see the world of heat instead of the world of light.

Proven Track Record

The company was founded in 2012 by two industry pioneering scientists, Bill Parrish, PhD and Tim Fitzgibbons PhD, who spent 40 years advancing the state of military and professional-grade thermal imaging technology. Following their previous two companies, Amber Engineering and Indigo Systems, each with successful acquisitions, Seek Thermal is their third venture with the mission to make thermal imaging a part of everyday life.

Built for Quality and Scale

Seek Thermal is partnered with Raytheon and NXP to design and deliver high-quality, affordable thermal imaging sensors and products across the globe at scale. As one of the few companies in the world capable of building sensors, Seek Thermal has shipped hundreds of thousands of thermal imaging products around the world as it continues to make thermal imaging an accessible, everyday tool, so people can do their jobs safer, faster and smarter.

** Seek Scan should not be used to diagnose or exclude diagnosis of COVID-19 or any other disease or condition. Specifications and undocumented specifications are subject to change without notice or liability.*
